PROFILE

Product Designer with 4+ years of experience designing digital products from discovery to delivery across B2B SaaS, EdTech and independent projects. Experienced in translating user research, behavioural data, business requirements and technical constraints into accessible, intuitive and scalable product experiences.

Most recently the sole UX/UI Designer at Oxford University Press, working across research, product strategy, information architecture, interaction design, accessibility, design systems, documentation and implementation in collaboration with multidisciplinary and international teams.

PROFESSIONAL EXPERIENCE

Oxford University Press

UX/UI Designer

Jan 2023 – Oct 2025 | Madrid, Spain

Led end-to-end UX/UI design across Oxford Premium and related educational products as the sole UX/UI Designer, working across research, product strategy, information architecture, interaction design, accessibility, design systems, documentation and implementation.

- **Research & product strategy:** Conducted research according to the needs of each project, combining **31 teacher interviews**, **600+ behavioural sessions**, usability testing, market and competitive research, and desk research to identify problems and inform product decisions.
- **Educational research:** Researched broader topics affecting the product experience, including **child development and developmental milestones**, **learning contexts and accessibility**, translating findings into practical considerations for educational products.

- **Information architecture:** Redesigned the organisation and navigation of thousands of educational resources, translating research findings into clearer structures, navigation, search and discovery flows.
- **Interaction & UI design:** Designed responsive end-to-end flows, wireframes and high-fidelity prototypes across desktop, tablet and mobile, balancing user needs with business goals and technical constraints.
- **Design systems:** Established the foundations of a scalable design system across multiple products, defining reusable components, design tokens, responsive behaviours, accessibility standards and implementation guidance.
- **Accessibility & inclusion:** Integrated **WCAG 2.1 A/AA** into product workflows through accessibility audits, accessible design patterns and screen-reader testing with NVDA, JAWS and Microsoft Narrator. Also participated in Oxford's **Diversity & Inclusion team**, contributing to broader conversations and initiatives around inclusive practices.
- **Validation:** Used interviews, behavioural analytics and usability testing to evaluate design decisions, including prototype testing with Maze and iterative validation before development.
- **UX documentation & culture:** Created documentation, guidelines and presentations tailored to different audiences, translating topics such as accessibility, research findings, design decisions and UX processes into practical resources for Product, Engineering, Editorial and other teams.
- **UX advocacy:** Helped develop UX/UI culture internally by sharing research, explaining UX and accessibility principles, presenting work and creating resources that made user-centred design more understandable and actionable beyond the design function.
- **Cross-functional delivery:** Worked directly with Product, Engineering, Editorial, Legal, Commercial, leadership and Oxford UK stakeholders, adapting research, documentation and communication to different audiences and supporting projects from early definition through implementation.
- **Ways of working:** Introduced more structured UX workflows, documentation and developer handoffs, using Jira, task-management tools and regular cross-functional communication to make scope, responsibilities and progress more visible.
- **AI-assisted products:** Supported AI-assisted educational experiences from the UX side, researching and documenting workflows, helping structure prompts and translating product needs into guidance and adaptations for development.

Plytix

UX Designer | B2B SaaS

Jul 2022 – Sep 2022 | Málaga, Spain

Joined Plytix as its first and sole UX Designer, helping establish UX practices within a B2B Product Information Management (PIM) platform.

- Introduced user-centred design workflows and UX documentation into the product process.
- Analysed existing interfaces, user behaviour and product requirements to identify usability issues and improve complex product workflows.

- Worked with Product Managers and engineers to translate user stories and requirements into interaction flows and UX solutions.
- Maintained and expanded design system documentation in Zeroheight, supporting more consistent use of reusable components and patterns.
- Used tools including Shortcut and Productboard to work within the wider product development process.
- Helped connect Product and Engineering around a more structured UX process and increase the visibility of UX within the organisation.

Independent Design Projects

UX/UI & Visual Designer

Jan 2021 – May 2022 | Spain

Worked independently across UX/UI, web design, branding and visual communication for educational organisations, NGOs, startups and individual clients.

- Designed responsive websites and digital experiences from requirements and early concepts through UX/UI design and implementation with developers.
- Created visual identities, branding systems and communication materials adapted to different organisations and audiences.
- Produced editorial, digital and campaign assets, including work for social-impact initiatives.
- Managed projects independently, working directly with clients to understand their needs, define requirements and translate business and communication goals into design solutions.
- Combined digital product, visual and communication design depending on the needs and scope of each project.

Sheedo

Product Designer Intern

Mar 2020 – Jul 2020 | Madrid, Spain

- Contributed to research and development for sustainable product concepts.
- Participated in product design, branding and packaging projects.
- Conducted feasibility and product research supporting the development of new concepts.

SKILLS & TOOLS

Product & UX

Product Design · Product Discovery · UX Strategy · Product Thinking · User Research · Market & Competitive Research · Information Architecture · User Flows · Interaction Design · Wireframing · Prototyping · Usability Testing · Behavioural Analysis

Systems & Delivery

Design Systems · Design Tokens · Responsive Design · Accessibility (WCAG) · UX

Documentation · Developer Handoff · UX QA · Cross-functional Collaboration · Stakeholder Management

Tools

Figma · FigJam · Maze · Hotjar · Contentsquare · Jira · Zeroheight · Productboard · Shortcut · Adobe Creative Suite · GitHub · Copilot · LLMs

EDUCATION

Master's Degree in Methodology of Behavioural and Health Sciences

UNED / UCM / UAM | 2026 – Present

Advanced training in research methodology combining quantitative and qualitative methods, data analysis, research design and evaluation. Coursework includes **Python, statistical methods, survey research, machine learning and advanced research design**, strengthening the quantitative and mixed-methods side of my product research practice.

Bachelor's Degree in Product Design

UDIT – University of Design, Innovation and Technology | 2017 – 2021

Multidisciplinary product design degree combining user-centred design, ergonomics, accessibility, interaction design and technical product development, including materials, manufacturing and industrial design principles.

Bachelor Thesis: Designed a modular protective helmet for children with Sensory Processing Disorder (SPD), combining accessibility, ergonomics, modularity and user-centred product design to improve comfort while reducing sensory overload.

Advanced Techniques & Tools for Social Science Research

Universidad Rey Juan Carlos | 2019 – 2020

Specialised training in social and user research methods, including qualitative research, usability testing, behavioural analysis, accessibility evaluation and heuristic evaluation.

Master in Interior Design

IED Madrid | 2016 – 2017

Training in spatial and experience design, combining concept development, visual communication, materials, technical development and human-centred approaches to physical environments.

Interior Design Technician (DEC)

Collège LaSalle Morocco | 2013 – 2016

Three-year technical programme in interior design covering spatial design, technical drawing, materials and visual representation. **Diploma of Excellence.**
